

Replace Liquid Lime with SOLU-CAL L

SOLU-CAL L

6-0-0 8% Ca Liquid Calcium Complex

Powered by **Humic Acid Technology**

Improves soil structure, stimulates root and leaf development, regulates soil pH, and strengthens cell walls.

- Clear brown liquid with no grit or sediment as found in liquid lime
- Calcium nitrate blend works more efficiently in soil than conventional liquid lime
- Will significantly increase stand density and seedling vigor
- Ideal for use in spray programs and fertigation
- **Powered by Humic Acid Technology** to increase nutrient availability & decrease NPK rates

Application Rates

Agricultural Crops: may be applied via spray equipment or directly through the irrigation system. Apply 3 - 5 gallons per acre and irrigate in thoroughly. For best results apply in late spring once plant has broken dormancy or new growth first appears.

Vegetable Crops: Apply 2 - 4 quarts per acre per application, water-diluted for thorough coverage.

Soil Applications for Grain, Vegetables: Apply 3 - 5 gallons per acre per season.

See label for mixing directions and additional agricultural & ornamental applications.
